

DIY Garden Room Kit Prices

Our range of self build garden room kits are ideal for homeowners who aren't in a position to wait for an installed garden room, office or studio. Our DIY garden room kits can be selected from the 'off the shelf' set size range or by using the 'made to measure' service for individual project requirements.

Every garden room achieves high levels of thermal performance and air tightness, requires minimal site assembly time and features a high-quality contemporary finish that will continue to perform year after year.

Our DIY garden room kits utilise a forward-thinking fabric first and modular approach and are manufactured at our purpose-built facility in Gloucestershire.

Panel size and weight have been carefully designed to make manual handling and assembly easy, even in areas of tight access, which in turn helps reduce on-site labour requirements. The prefabricated panels are manufactured using high quality grey EPS insulation and FSC certified and graded timber, to exacting standards.
